Or, more clearly, it's a word that describes a person or something. Adjectives are words that change other words to make language more interesting or specific. The National Curriculum guide offers the following tips: "The safest way to identify adjectives is for the ways they can be used: before a noun, to make the meaning of the noun more specific (i.e. to change the noun), or after the verb is, as its complement. English adjectives cannot be modified by other adjectives. This distinguishes them from the nouns, which can be. Sometimes adjectives are called "words that describe" because they choose individual features such as size or color. This is often true, but it does not help to distinguish adjectives from other classes of words because verbs, nouns and adverbs can do the same."
